Applicants' arguments, filed 10/7/02, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 1-19, 21-26, 28-39, and 67-89 are rejected under 35 U.S.C. § 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

It is noted that the claims have been amended to delete addressing by the application of an electronic potential and replace the addressing limitations with transporting which is again NEW MATTER. It is acknowledged that electrodes are utilized in the instant invention for said transporting, however, the specific transporting via electronic "potential" has not been found as filed. Applicants have pointed to various citations in the instant specification including citations in U.S. Patent Number 5,632,957 as incorporated by reference. Consideration of all of these citations has failed to reveal the specific electronic "potential" practice of transport. For example, in the instant specification on page 43, lines 17-27, Columns 1 and

3 are electronically addressed via electrodes. In line 21 therein 400 nA per electrode is cited which is a current and not a potential citation. Thus, the further detailed limitation of electronic transport is not stated as being specifically a "potential" control practice. That is, no mention of potential for transporting is cited therein. Similarly, on pages 44-45 of the instant specification, columns are activated but without stating that this is a "potential" focused activation. In the U.S. Patent 5,632,957 in column 4, line 60, through column 5, line 8, electronic control is cited but again without this being clearly a "potential" control practice. In column 8, lines 22-60, electrophoretic transport is described but again without "potential" being applied. This rejection is necessitated by amendment.

No claim is allowed.

Applicants' amendment necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicants are reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE

STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
